

Abstract

Water Soluble Sachet Containing Hard Surface Cleaner

5 The invention relates to a water-soluble container which contains a composition
useful for hard surface cleaning. The composition comprises at least one surfactant
selected from non-ionic surfactant, anionic surfactant, and mixtures thereof, at least
70%wt. of at least one organic solvent having a solubility in water of at least 4%wt.,
optionally at least one alkanolamine; and optionally, conventional additives. The water
10 soluble containers can be made by thermoforming or injection molding.
